

Sightgard® Protective Eyewear

*Because every life has a **purpose...***

Sightgard® Protective Eyewear

All MSA Sightgard Safety Glasses and Goggles listed in this catalog are compliant with the general protector and impact requirements of ANSI/ISEA Z87.1-2010. Many are also compliant with CSA Z94.3-2007 and/or listed with CSA International as certified (as noted).

Eyewear Features

MSA Sightgard Protective Eyewear line offers *great styles – great options – great value:*

- Anti-fog coating and/or UV 400 additive offered on many styles.
- Anti-scratch coating provides excellent scratch resistance, extending lens life—a “must have” in abrasive work environments.
- Horizontal (sliding) or vertical (ratchet) temple adjustment models offer custom fit.
- Soft rubber nose bridges offer comfortable, non-slip support.
- Flexible rubber-tipped temples provide comfortable, all-day wearing.

Try It! Program

Many studies have shown that if eyewear impairs vision or is uncomfortable, workers tend to wear it incorrectly to compensate or remove it altogether — strongly increasing the risk of serious injury, as well as workers’ compensation claims and other costs. **MSA wants to help.**

Our **FREE** sample “Try It!” program offers >100 products customers can sample *before* they buy them. Most MSA Sightgard safety eyewear are included. Just look for the “Try It!” symbol and call your MSA representative for your **free** sample!

Choosing the Proper Lens

Choosing the right lens for the job will not only protect eyes, but could also improve the wearer’s working experience. Our Lens Color Reference Chart lists benefits and uses for common lens options.

LENS COLOR/TINTS						
USE	Good for low-light conditions, especially at dawn/dusk and on foggy days. Increases contrast and enhances detail. Ideal lens for operations requiring optimum contrast of similar or small objects.	General purpose lens for indoor use, or outdoor use in low-light conditions. Provides maximum light transmission.	Enhances perception in changing light and shadow. Good for low light conditions.	Allows easy transition from inside to outside with same pair of glasses. Ideal for use while driving.	Most popular lens tint for outdoor use. Protects against visible glare without color degradation. Good choice for outdoor work, such as construction and landscaping.	Offers the same benefits as light mirror, but also allows easy transition from inside to outside with same pair of glasses. Ideal lens for occupations such as forklift drivers, dock workers, and truck drivers.
LENS COLOR/TINTS						
USE	Reduces glare and bright sunlight by reflecting light away from the lens. Enhances contrast without color degradation. Good general purpose lens for outdoor use.	Reduces intense sun glare reflected off shiny surfaces such as snow, water, sand and pavement. Improves contrast and depth perception. Great for outdoor use; not good for use while driving.	Superior glare reduction with heavy mirroring. Great lens for outdoor use in full sun conditions—favored by outdoor workers such as roofers, landscapers and builders.	Protects against low to medium infrared (IR) radiation up to Shade 5. Good choice for metal pouring, gas soldering, cutting and brazing operations.	Alleviates eye strain and fatigue by reducing glare caused by fluorescent and halogen lighting. Enhances contrast by absorbing all colors equally. Good choice for inspection operations or assembly work.	Blocks High-Energy Visible (HEV) light, also known as blue light (~400-500 nm). Blue light has been linked to certain eye diseases (such as macular degeneration) and to the suppression of melatonin (a hormone that helps regulate other hormones and stabilizes sleep patterns).

Sightgard Safety Glasses: Indoor Humid Conditions

- Classification:** Indoor: humid environments
- Market(s):** Facility maintenance, repair and operations, construction, food and beverage, general manufacturing and industry, mining, oil and gas, pharmaceuticals, transportation, shipbuilding, automotive
- Application(s):** Assembly and mechanical, drilling, grinding, machining, painting, sanding, sawing
- Material:** Polycarbonate
- Features:** Anti-fog coating
Clear lenses
Impact-rated (Z87+)
Anti-scratch coating (as noted)
- Standards¹:** ANSI/ISEA Z87.1-2010 and CSA Z94.3 (as noted)
- Certification:** CSA International and Third party testing by Intertek

Finding the Right Eyewear

Look for frames that complement your face size and shape.

Round face	Diamond-shaped face	Square face	Slender face	Larger face
Choose rectangular frames to sharpen round, soft faces	Choose oval frames to soften angled facial contours	Cat-eye frames provide sleek, curvy contours to square features	Choose small frames designed for slender faces to keep proper facial proportions and improve fit	Choose frames with flexible temples, spring-loaded, or serpentine hinges for a comfortable, custom fit

Frame Material

Choose a frame material that suits your style and needs.

Polycarbonate

- More impact-resistant than standard plastic frames
- Thin, lightweight, and strong make it an ideal choice for work environments
- Endless color choices and finishes

Nylon

- Maintains shape and flexibility even in hot/cold environments
- Improved chemical resistance

Metal

- Strong, yet flexible
- Popular with younger workers
- May not be a good choice for all work environments

MSA Logo Eyewear Program

How it Works

Want to customize your Sightgard Protective Eyewear with a company logo or design for a truly distinctive look? Check out the following guidelines to get started, and then call MSA Customer Support at 1-800-MSA-2222 for prompt assistance with your customized order.

MINIMUM ORDER QUANTITY (MOQ)	1,152 eyewear pairs per logo/model/order.
SHIPMENT	MSA will not hold stock of customized eyewear. The entire MOQ will be shipped upon receipt of payment by MSA. Expedited delivery is available with some models. The customer is responsible for air freight costs when requesting expedited delivery.
FIRST ORDER LEAD TIME	Lead time is 75 – 90 days from the date the order is placed with MSA.
LOGO/DESIGN SUBMISSION	The logo/design graphic file can be sent as an e-mail attachment. (Do not embed graphic in e-mail.) Acceptable file formats include ONLY: .tif, .gif and .jpg. <i>NOTE: pdf formats are not acceptable.</i>
OTHER CONSIDERATIONS	<ul style="list-style-type: none"> • MSA will place the order upon written customer approval of a picture of the eyewear with its logo/design, or the actual eyewear model with its logo/design, as preferred by customer. • Logos/designs cannot be applied to product packaging.

Note: This Bulletin contains only a general description of the products shown. While uses and performance capabilities are described, under no circumstances shall the products be used by untrained or unqualified individuals and not until the product instructions including any warnings or cautions provided have been thoroughly read and understood. Only they contain the complete and detailed information concerning proper use and care of these products.
