

Advantage[®] 200 LS and 3200 **Respirators**

Advantage 200 LS Half-Mask Respirator

Comfortable Fit and Balance

Mask can be adjusted to the wearer for a comfortable fit, helping to reduce potential pressure points throughout the day.

Swept back cartridge design helps to provide stability and weight distribution on the face.

Lower Total Cost of Ownership

The Advantage 200LS keeps replacement, and maintenance costs down by only having 4 main components.

1. Facepiece blank
2. 4-point yoke
3. Inhalation/exhalation valves
4. Head harness

Advantage 3200 Full-Facepiece Respirator

Comfortable Fit and Balance

The Advantage 3200 design includes a nose cup, to help reduce fogging in low temps or high humidity, so that you are able to focus on the task at hand.

The wrap around scratch-resistant face piece lens provides wide field of vision while also meeting ANSI Z87.1 high-impact performance requirements.

Reduce Respirator Downtime

All components of the Advantage 3200 can be replaced without special tools - for quick maintenance and limited downtime of your respirator.

WE KNOW WHAT'S AT STAKE.

R95 Snap-On Prefilter and Cover	815397 Box of 20 815401 Reusable Snap-On Cover, 2 in a Package		An appropriate cartridge change-out schedule must be developed by a qualified professional, unless the cartridge/canister utilizes an end-of-service-life indicator. The change-out schedule must take into account all factors that may influence respiratory protection including specific work practices and other conditions unique to the worker's environment. If using against substances having poor warning properties, there is no secondary means of knowing when to replace the cartridges/canister. In such cases, take appropriate additional precautions to prevent overexposure, which may include a more conservative change-out schedule or using an air-supplied respirator or SCBA. Failure to follow this warning can result in serious personal injury or death. As a reference, below is a partial list of substances having poor warning properties:															
Definitions			Acrolein				Hydrogen cyanide				Nitric acid				Phosphorus trichloride			
N95-Particulate Filter (95% filter efficiency level) effective against particulate aerosols free of oil; time use restrictions may apply.			Aniline				Hydrogen selenide				Nitro compounds				Stibine			
R95-Particulate Filter (95% filter efficiency level) effective against all particulate aerosols; time use restrictions may apply.			Arsine				Methanol				Nitrogen oxides				Sulfur chloride			
P100-Particulate Filter (99.97% filter efficiency level) effective against all particulate aerosols.			Bromine				Methyl bromide				Nitroglycerin				Urethane or other diisocyanate-containing paints			
			Carbon monoxide				Methyl chloride				Nitromethane							
			Diisocyanates				Methylene chloride				Phosgene				Vinyl chloride			
			Dimethyl sulfate				Nickel carbonyl				Phosphine							
* Effective against, but not NIOSH-approved, for Iodine Vapor.																		
Notes																		
1. Do not use in atmospheres containing less than 19.5 percent oxygen, in atmospheres containing gases or vapors or in atmospheres immediately dangerous to life and health.																		
2. Do not use in atmospheres containing less than 19.5 percent oxygen, or in atmospheres immediately dangerous to life and health.																		
3. Do not wear for protection against organic vapors with poor warning properties or those which generate high heats of reaction with the sorbent material in the cartridge.																		
4. 99.97 percent efficient against 0.3 micron DOP.																		
5. Both a prefilter and cover must be used with the cartridge in order to obtain R95 or N95 particulate protection.

To meet OSHA's respiratory protection fit-testing requirements, MSA offers facepiece-testing kits and accessories. As you may know, qualitative fit-test methods are subjective in nature and rely on the judgment of the test subject, and quantitative testing methods rely on objective data to determine a proper fit. Please consult with your Respirator Program Manager to ensure proper fit.
