

HOLE DOZER™ General-Purpose Hole Saw Kit - 15PC

The 15-piece General Purpose Ice Hardened™ Hole Saw Kit from Milwaukee includes 11 hole saws in common sizes to make cuts in both in wood and metal. This Ice Hardened™ hole saw kit benefits from Milwaukee's exclusive cryogenic process that removes softer metal from the blades to make them rigid for strength and smoother cuts. The pilot bits allow you to mark the center of the hole and start from there to ensure the hole's exact location. The Matrix II bi-metal hole saw kit design utilizes two different metals to get an ideal combination of durability and cutting power. Milwaukee's innovative tooth form decrease cutting time by up to half that of traditional hole saws.
