

12 in. 5 TPI The Ax™ SAWZALL® Blade (5 Pack)

These Milwaukee 12-Inch Ax Sawzall Blades feature a nail guard™ design and coarse teeth to tear through even hard boards with nails. Skipping is not an issue with these wood cutting blades due to their fang tips, and the bimetal construction of hard teeth attached to a flexible body is the ideal mix of strength and durability. The higher body of these blades keeps them from twisting as you cut for enhanced precision, and the universal shank allows you to enjoy Milwaukee performance in many types of reciprocating saw. Ax Sawzall blades are thicker and more rigid than disposable reciprocating blades for longer blade life and greater economy. Stock up on these blades to ensure that you can finish your job at exactly the right pace.
