Decorator Switches PlugTail™ Devices Spec Grade 15 & 20A, 120/277VAC

PT2601, PT2621, PT2603, PT2623, PT2625, PT2626

PlugTail™. The fastest, most consistent and reliable wiring devices – ever.

Factory-terminated devices and connectors mean that device installation is the same regardless of skill level of the installer. The UL-Listed connectors are keyed to ensure proper wiring installation into each receptacle. The connector simply snaps into the back of the device – no fussing with wires, stripping, or tightening screws. PlugTail devices are finger safe with no exposed terminals, so taping is not required. Now device installation is a snap!

FEATURES & BENEFITS

Heavy-gauge steel strap for superior strength.

Auto-ground clip assures positive ground.

Shallow design for easier installation.

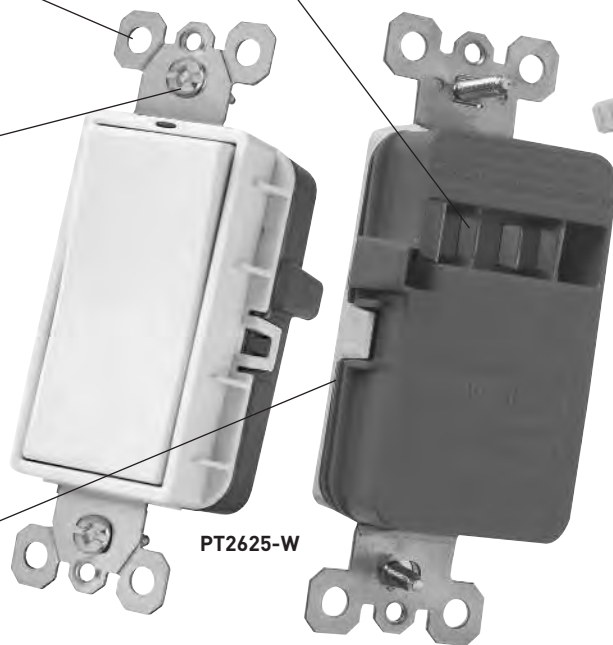

No exposed terminals create a finger safe application before, during, and after installation.

Built-in connector features large brass terminal blades to ensure consistent, reliable electrical connections.

Large brass contacts snugly terminate on device blade terminals. Audible snapping latch assures connection, allows release.

Polycarbonate connector housing secures terminations and conductors in a UL Listed, finger safe housing.

Pre-stripped connector leads fasten to conductors, easier than standard pigtails.
