

Extendo Nut Driver

The Extendo Nut Driver kit is designed to adapt a standard 1/2" conduit into an extension nut driver for threaded rod. Utilizing the concept of a hollow shank nut driver, the Extendo gives you the flexibility to cut the 1/2" EMT any length you need to drive the nut up the full length of threaded rod. With this tool on hand, you no longer need to buy multiple size hollow shank nut drivers! Save yourself time and money with this complete extension nut driver kit.

Kit includes: 7/16", 9/16", and drill attachment.
7/16" nut driver attachment for 1/4" threaded rod.
9/16" nut driver attachment for 3/8" threaded rod.
No need to buy multiple hollow shank nut drivers.
Drill attachment designed for 1/4" chuck, will fit quick change drills.
Adaptable to any length nut driver needed.
