## Danfoss *LX*Electric Floor Heating

### **Dual Self-Adhesive Mats**

Danfoss LX Electric Floor Heating System (Self-Adhesive Mat & Thermostat) is an affordable luxury that brings warmth to life. It's a proven technology that is safe, reliable and energy efficient. The unique adhesive system SAVES 70% ON INSTALLATION TIME!

- Pre-applied heating cable means even heat every time
- Dual-adhesive backing, no fastening required
- Single point connection
- Twin conductor cable
- Eliminates EMF's (electromagnetic fields)
- Customize mat on the job site
- Minimal thickness-only adds 3/16" height to the floor
- Safety approved for wet locations
- · Even heat every time
- No fastening required
- Genuine twenty year warranty

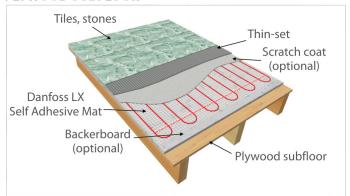

| Technical Data          | LX Mats  |
|-------------------------|--|
| Mat Construction:       | Thermoplastic polymer coated fiberglass, self adhesive backing |
| Cable Construction:     | Twin Conductor   |
| Cable Diameter:         | 3/16" (4.8mm)  |
| Rated Voltage:          | 120V, 208V, 240V   |
| Max. Rated Temperature: | 212°F (100°C)  |
| Conductor Insulation:   | Teflon™ FEP  |
| Outer Insulation:       | PVC  |

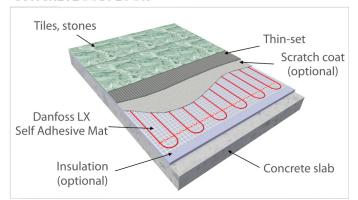

## **Typical Applications**

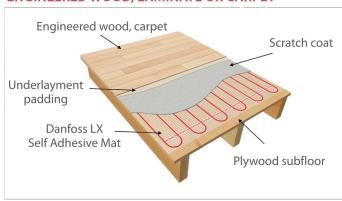

### **PLYWOOD SUBFLOOR**

#### **CONCRETE SUBFLOOR**

### **ENGINEERED WOOD, LAMINATE OR CARPET**

#### Notes:

- · All mats are 2 feet in width
- Power leads are 10 feet in length
- Watt output of the 240V mats are reduced by 25% when operated at 208V (9W/sq.ft.)
- Floor sensor conduit is included
- Contactor or Power Module is required for loads exceeding 15 amps on a single thermostat (see pg.6 for details)

Controls - See PG. 5
Accessories - See PG. 6

## **Electric Floor Heating Cables**

Danfoss LX Electric Floor Heating Cable Systems combine the highest comfort levels with the maximum energy efficiency. Our Electric Floor Heating Cable Systems offer the following features:

- Single point connection
- Twin conductor cable

**Technical Data** 

Cable Construction:

Max. Rated temperature:

#### Notes:

- Cable strapping is supplied with product. Additional cable strapping can be ordered separately (See pg. 6)
- 2" centers provide 18W/sq.ft.
- 3" centers provide 12W/sq.ft.
- 4" centers provide 9W/sq.ft.
- Watt output of the 240V cable is reduced by 25% when operated at 208V (approximately 2W/ft.)
- Power leads are 10 feet in length
- Floor sensor conduit is not included (Part # 19809099)
- Contactor or Power Module is required for loads exceeding 15 amps on a single thermostat (See Pg. 6)

Controls - See PG. 5 Accessories - See <u>PG. 6</u>

**LX205 T WIFI Touch Thermostat**(**Programmable**)
Part # 088L5140

## LX205 Thermostat (Non-Programmable)

## **Electric Floor Heating Thermostats**

The Danfoss LX Thermostat raises the bar for aesthetic appeal while offering industry-leading functionality. The LX electronic thermostat offers optimum comfort and numerous user friendly features:

- 3.5" Color Screen with Easy Interactive Touch Control
- New Easy Scheduling method & even easier on the fly changes
- Track Power consumption and save it to a PC with a few simple steps
- Thermostat settings can be exported to web page for support
- · Universal compatibility with existing floor heating sensors
- Suitable for tile, stone, laminate, concrete and engineered wood floor applications

- 5 Year Battery backup of clock and calendar
- Sleek design Patent pending

### **LX Power Module**

The LX Series Power Module makes it easy to connect more heating mats or cables to the same thermostat without the need for contactor panels.

- An easy control solution for large areas
- Receives on/off command from the main thermostat
- Each Power Module adds 15A switching capability
- Up to 5 Power Modules can be added to the thermostat
- Includes Class-A GFCI for safety (approved for wet locations)
- For use with Programmable LX thermostat only

## **Little Buzzer - Continuity Alarm (088L0028)**

Simplify your installation process by using the Little Buzzer by Danfoss.

The Little Buzzer is designed to monitor Danfoss Heating Mats or Cables during installation and will sound an alarm if the heating element is cut or damaged. This allows an easy repair before the floor covering is laid. The Little Buzzer is battery powered with a set of batteries included.

NOTE: A continuity alarm does not replace the need for measuring and verifying the Ohm resistance three times throughout the installation process. Failure to do so may result in voiding the warranty.

Floor Sensor

## Danfoss *Reflect* **Electric Floor Heating**

### **Reflect Insulation Plates**

Reflect Insulation Plates are a revolutionary designed product that eliminates the need for a top coat on floating floors. When combined with Danfoss LX Heating Cables, Reflect provides the perfect solution for quick and easy installation of electric floor heating under engineered wood or laminate floors. The combination of an insulating sub floor and a heat conducting surface ensures optimum heat is delivered up through the floor.

- Best solution available for heating under laminate and engineered wood flooring
- Saves time, no mixing of thin set or mud required
- Reflective plates heat quickly and evenly for maximum comfort

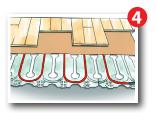

Lay out Reflect Plates

Clip plates together, cut plates with jigsaw if necessary

Install heating cable in grooves, pressing gently

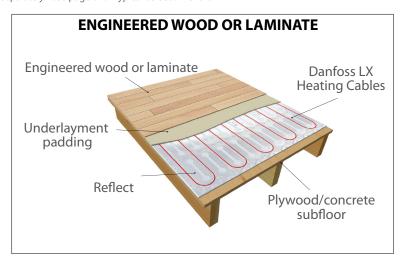

Lay underlayment padding and then the floor covering

# Danfoss TX<sub>FH</sub> Electric Floor Heating

## **Electric Floor Heating Cables**

Danfoss TXFH Cables are a thick floor heating solution. Thick cables have a larger diameter than the Danfoss LX Floor heating cables, allowing them to be lower in COST, higher in HEAT OUTPUT and more DURABLE. They are installed in mud beds below the flooring materials and are most often used in new construction where overall material cost is a primary concern.

- Extremely durable
- · High output means less cable required
- Single point connection
- Twin conductor cable
- Eliminates EMF's (electromagnetic fields)
- Safety approved for wet locations
- Genuine twenty year warranty

#### Cable Notes:

- Cable strapping is not supplied with product. Additional cable strapping can be ordered seperately.
- Power leads are 10 feet in length
- 4" centers provide approximately 17W/sq.ft.
- 5" centers provide approximately 14W/sq.ft.
- 6" centers provide approximately 12W/sq.ft.
- Watt output of the 240V cable is reduced by 25% when operated at 208V (approximately 4.5W/ft.)

Controls - See PG. 11 Accessories- See PG. 11

## **Danfoss** *TXsH* **Thermal Storage Heating**

## **Thermal Storage Heating Cables**

Danfoss TXsH (Storage Heating System) heating cables are energized to warm a thermal mass below the floor surface. Danfoss TXsH is the ideal way to take advantage of local on-peak and off-peak energy prices. When the power system is in off-peak times, energy rates are lower. When on peak times resume, the Danfoss TXsH system shuts off and the heat stored in the floor gently emanates across the floor surface for hours. The Danfoss TXsH system provides an energy efficient and cost effective method of heating, in a clean and silent manner.

- Twin conductor cable
- Single point connection
- Easy and flexible installation
- Durable construction
- Eliminates EMF's (electromagnetic fields)
- Silent, efficient, automatic and safe
- Lower capital and operational costs
- · Genuine twenty year warranty

## Danfoss TX **Thermal Storage Heating**

## **Thermal Storage Heating Mats & Cables Typical Applications**

### SAND BED INSTALLATION

### **CONCRETE INSTALLATION**

## **Electric Snow Melting Mats & Cables**

Installing a Danfoss GX Snow Melting System provides a permanent solution to the problems caused by cold weather. The GX Snow Melting System is an on demand system that will provide you with improved safety by providing instantaneous relief from snow build up and ice forming. There is no need for costly snow melting chemicals that can damage interior and exterior flooring finishes. The GX Snow Melting System allows you to improve your bottom line by reducing the labor and machinery costs associated with clearing snow and ice.

- Twin conductor cables
- Single point connection
- Flexible and simple to install
- Durable construction
- Operates silently, efficiently and safely
- Ideal for driveways, parking lots, sidewalks, stairs, ramps, bridges and many other applications
- For use in concrete, asphalt and under pavers
- Eliminates EMF's (electromagnetic fields))
- GX Heating Mats significantly reduce installation time and labor
- Genuine twenty year warranty

Prepare the area.
Insulation below and on the sides of the slab are recommended

Lay out the GX Mats or Cables

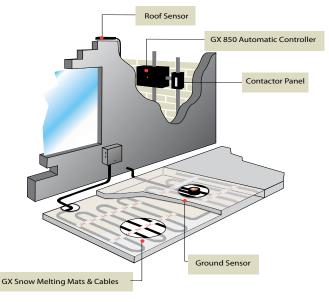

Install ground sensors at opposite ends of the area

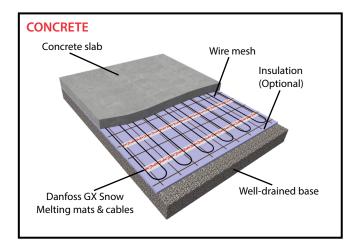

| Technical Data          | GX Mats & Cables         |
|-------------------------|--------------------------|
| Cable Construction:     | Twin Conductor           |
| Cable Diameter:         | 1/4" (6mm)               |
| Rated Voltage:          | 208, 240, 277, 480, 600V |
| Max. Rated Temperature: | 220°F (105°C)            |
| Conductor Insulation:   | Teflon™ FEP              |
| Outer Insulation:       | PVC                      |

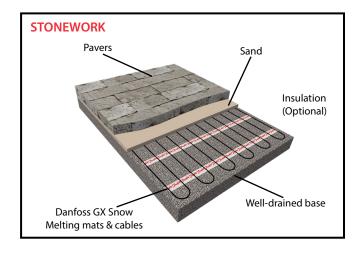

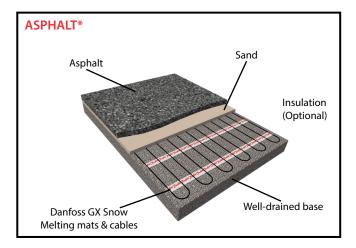

#### **SYSTEM COMPONENTS**

## **Typical Applications**

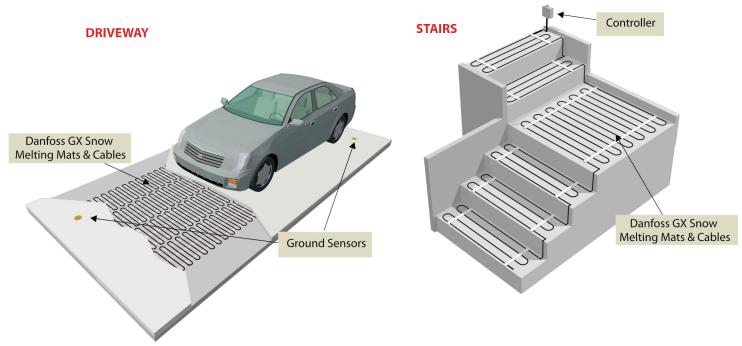

#### \*Notes:

- Cables can be embedded in sand or concrete (1.0"/25.4mm) for extra protection
- If using sand or concrete with asphalt, allow asphalt to cool to 265° F (130° C) before pouring directly on mats/cables
- If using without sand or concrete allow asphalt to cool to 220°F (105° C) before pouring directly on mats/cables

#### Notes:

- All mats are 2 feet wide
- Power leads are 20 feet in length
- Watt output of the 240V mat is reduced by 25% when operated at 208V (Approximately 37.5 W/ sq.ft.)

Controls - See PG. 19 Accessories- See PG. 22

### Notes:

- Power leads are 20 feet in length
- 3" centers provides 50W/sq.ft.
- 4" centers provides 35W/sq.ft.
- Watt output of the 240V mat is reduced by 25% when operated at 208V (Approximately 9 W/ft.)

Controls - See PG. 19 Accessories- See PG. 22

GX 850ACP

**Ground Sensors** 

**Roof Sensor** 

GX-850M

### **Electric Snow Melt Controllers**

### **GX 850 Dual Zone Automatic Control Panel**

The AWARD WINNING Danfoss GX Dual Zone Automatic Control Panel (ACP) is the most optimal solution for keeping any area free of ice and snow. The GX 850 acts on information received from sensors which register both temperature and moisture, then calculates the information ensuring that the heat will only be turned on when snow and/or ice is present. The result is optimal performance with maximum energy savings and minimum operating costs.

- User interface allows total control of snow melting system set points
- Set to maximum melting, or maximum energy savings or anywhere in between
- Dual zone feature allows for energy savings
- Digital sensors provide precise feedback on snow and ice conditions
- Fault finding program detects and alarms on faults
- Can be field upgraded to take advantage of new features
- Integrate one to four separate sensors
- Two year warranty

## **DUAL ZONE EXAMPLES**

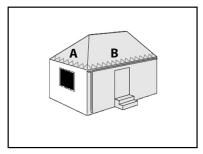

#### **Roof & Ground Zones**

#### Two Ground Zones

Two Roof Zones

### **Electric Snow Melt Controllers**

The DS-2C/DS-5C Snow Melt Controllers are designed for pavement snow melt applications. They can be used as a stand alone controller or as a sensor for larger control systems.

#### DS-2C

- Housed in a weatherproof enclosure
- Senses both moisture and temperatures
- Adjustable temperature trigger point
- Expanded 30-90 min. & 2-6 hr. delay off drying time
- Manual override capable
- Selectable low temperature cutoff with unique Recover module
- Super bright front panel power/activation LED indicator
- Remote control and monitor capabilities
- Easy to install
- Two year warranty

### DS-5C

- Housed in a weatherproof enclosure
- Senses both moisture and temperatures
- Adjustable temperature trigger point
- Adjustable delay off drying time
- Manual override capable
- Selectable low temperature cutoff
- Remote control and monitor capabilities
- Easy to install
- Two year warranty

**Contactor Panel** 

### **Electric Snow Melting Panels**

#### **Contactor & Timer Panels**

The Danfoss Contactor and Timer panels are primarily designed for snow and ice melting applications. All panels are pre-wired and UL listed complete with a NEMA 1 enclosure, wiring diagram, terminal connection block, timer (timer panels), and two or four 3-pole contactors. Timer panels can be used stand alone or in conjunction with an automatic controller. Contactor panels must be used in conjunction with an automatic controller.

- Low Cost
- Easy to install
- NEMA 1, UL listed panel box
- Heat on indicator light
- Pre-wired terminal connections
- Two year warranty

| Technical Data          | Contactor / Timer Panels                 |
|-------------------------|--|
| Power Voltage Range:    | 208V - 600V                              |
| Max. Heating Load:      | 300A/600A                                |

| Dimensions (H x W x D): | 10" x 10" x 4" (254mm x 254mm x 102mm)   |
|                         | 14" x 12" x 6.5" (355mm x 305mm x 165mm) |
| Timer Override:         | 4 Hours                                  |

### **GFEP (Ground Fault Equipment Protection) Contactor Panels**

Simplify your installation with the GFEP Panels. Danfoss GFEP panels have built-in ground fault equipment protection, minimizing the risk of faults and eliminating extra wiring installation steps and costs. The panel can be activated by a Danfoss GX 850 ACP, DS controller or any other type of controller.

- Easy to install
- NEMA 1, UL listed enclosure
- Integrated 30mA GFEP (Optional)
- A LED trip indicator (internal)
- A LED heat on indicator
- Pre-wired terminal connections
- 120V on/off remote heat indicator
- Two year warranty

| Technical Data         | GFEP Panels                              |

## Danfoss RX Roof & Gutter De-Icing (Residential)

## Residential Roof & Gutter De-Icing Cables: RX -Kits

Danfoss RX Cables provide the protection needed to prevent ice dams and build-up from damaging RESIDENTIAL buildings, roofs, and gutters. Danfoss RX constant watt heating cables ensure maximum energy efficiency and are designed for use with metal or asphalt roofing. Durable and high-quality materials provide excellent moisture, corrosion and impact protection. Simply plug the RX kits directly to the power receptacle.

- Professional grade cable and AC Plug
- 100% aluminum foil screen
- Electrical Shock Resistant (ESR)
- · High grade heating element
- Durable and high-quality materials provide excellent moisture, corrosion and impact protection
- Tough UV rated cable will withstand the harshest conditions
- Kit comes complete with necessary shingle and spacer clips
- Two year warranty

#### KIT INCLUDES:

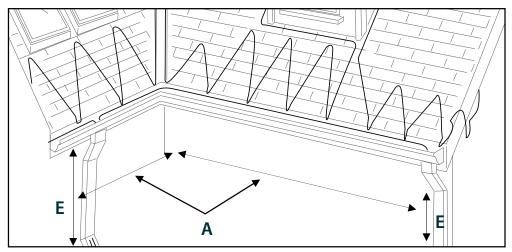

- 120V, HEATING CABLE WITH GROUNDED PLUG
- SPACER CLIPS
- SHINGLE CLIPS
- INSTRUCTION MANUAL
- 6FT. POWER LEAD

Controls - See PG. 24 Accessories- See PG. 24

## Danfoss RX Roof & Gutter De-Icing: (Residential)

### Product Selector for a Basic Roof \*\*see manual for more complicated roof lines

- 1. Total length (ft) of roof line (A) X = RL
- 2. Total length (ft) of all down spouts (E) X = DS
- 3. Add RL + DS = estimated length (ft) of cable required

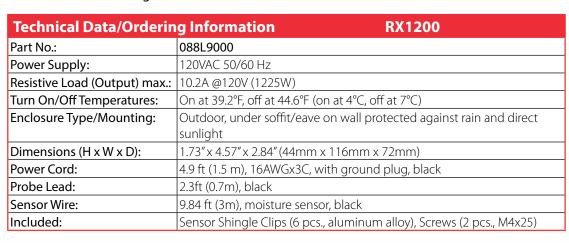

## Residential Roof & Gutter De-Icing Controls RX1200 Roof and Gutter De-icing Controller

The RX1200 offers an easy, no maintenance operation and is designed for use with Danfoss RX Cables. The RX1200 Controller senses both moisture and temperature conditions.

- Fully automatic
- Plug and play installation
- Extends life of roof de-icing system
- Pre-assembled & ready-to-install
- Prevent roof damage and leaks

## Commercial Roof & Gutter De-Icing Controls DS-8C Remote Sensor Controller for Snow Melting Applications

The DS-8C is designed for roof and gutter/snow melting applications. It senses both moisture & temperature conditions in gutters or down spouts. The sealed low voltage, remote mount precipitation sensor can be mounted in a down spout, on the back of a gutter, under the drip edge, up to 10 ft. away, while keeping the main controller in a more convenient and protected location.

- · Housed in a weatherproof enclosure
- Senses both moisture and temperatures
- Adjustable temperature trigger point
- Expanded 30-90 min. & 2-6 hr. delay off drying time
- Super bright front panel power/activation LED indicator
- Remote control and monitor capabilities
- Easy to install

| <b>Technical Data</b>     | DS-8C   |

### **Typical Application with RX-C Clips**

- **Apply Adhesive:**
- Apply 0.2 oz. of adhesive to back of clip.
- (Please note required application temperatures when applying glue.)

- **Press Clip to Roof Surface:**
- Lift shingle & orient clip.
- Press down (ensure adhesive flows through holes).
- Do not trim back adhesive beads.
- Press shingle down.

- **Install Cables/Close Clamps**
- Allow proper cure time (typically 24 hours-refer to adhesive.)
- Install RX-C de-icing cable.
- Use pliers to close clamps (ensuring not to damage cable).

## Danfoss *Ice Guard*Self-Regulating Cables

### **Freeze Protection**

The Danfoss Ice Guard (SRIG) heating cable provides an easy to use solution for a variety of pipe freeze and roof and gutter applications. The heat output of the conductive core material increases and decreases when it is needed as it adjusts the power output to the varying conditions along the length of the pipe. This ensures maximum energy efficiency by producing heat only when and where it is needed.

- Cable can be overlapped without creating hot spots or causing a burn out
- 6 foot long power lead
- Pre-terminated with a plug and end seal
- Rugged 16 AWG bus cable with longer runs
- Limited 10 year warranty

| Technical Data           | Ice Guard (SRIG) Cables                             |

## **Pipe Freeze Protection**

The Danfoss PX Series of SELF-REGULATING Parallel Circuit Heating Cables provide the solution to basic FREEZE PROTECTION applications. The self regulating Danfoss PX series ensures maximum energy efficiency by producing heat only when and where it is needed as it adjusts the power output to the varying conditions along the length of the pipe.

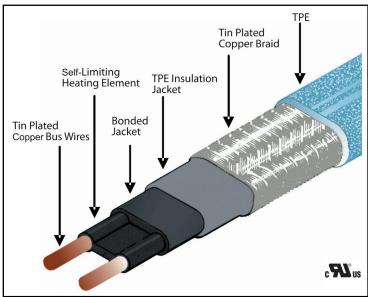

- Cable can be overlapped without creating hot spots or causing a burn out
- Cable can be cut and spliced in the field, simplifying the installation process and reducing waste
- Rugged 16 AWG bus cable with longer runs
- Wide variety of heat outputs available
- Limited 10 year warranty

### **Pipe Freeze Protection**

### **Weatherproof Thermostat**

The Weatherproof Thermostat is designed for temperature control applications and serves as operational control only.

- Automatic activation reduced operational costs
- Remote bulb temperature sensing
- Large, readily visible dial
- Wall mounted
- Water-tight enclosure

### Ohm's Law

Ohms law states that current in a resistance varies in direct proportion to voltage applied and inversely proportional to resistance.

I=V/R

V= voltage in volts (V)

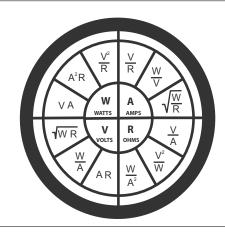

I= current in amps (A)

R= resistance in ohms (R)

The 3 most common mathematical expressions are:

V=I\*R I=V/R R=V/I

An unknown electrical value can be obtained by using any two known values in one of the variations of Ohm's Law shown in the circle.

### **Percentage of Rated Wattage for Different Applied Voltages**

| Applied |      | Rated Voltage |      |      |      |      |      |  |  |  |  |
|---------|------|---------------|------|------|------|------|------|--|--|--|--|

### **Typical 3-Phase Wiring Diagrams & Equations for Resistive Heaters**

VP= Phase Voltage

VL= Line Voltage

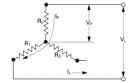

IP= Phase Current

IL= Line Current

R=R1=R2=R3= Resistance of each branch

W= Wattage

3-Phase Wye (Balanced Load)

Equations for Wye Only

 $I_P = I_L$ 

 $V_P = V_L / 1.73$ 

 $V_P - V_L / 1.73$  $V_{WYE} = V_L^2 / R = 3(V_P^2) / R$ 

 $W_{WYE} = 1.73 V_L I_L$ 

3-Phase Delta (Balanced Load)

**Equations for Delta Only** 

 $I_{P}=I_{L}/1.73$ 

 $V_P = V_L$ 

 $\dot{W}_{DELTA} = 3(V_L^2)/R$ 

 $W_{WYE} = 1.73 V_L I_L$ 

## **New!** Request for Quote Forms

Danfoss asks specific questions when quoting a job and have compiled these into easy to complete forms to get you the best quote possible. Please provide answers to these questions when requesting a quote. To request these forms in interactive electronic copies please email **electricquotes@danfoss.com** .

## Summary Conditions for Sale & Warranty

#### **SUMMARY CONDITIONS FOR SALE AND WARRANTY**

The acceptance of the order confirmation by the purchaser includes the acceptance of our "General Conditions of Sale and Warranty" as the only ruling condition. No modification of these conditions will be recognized by Danfoss. Any express or implied condition, statement or warranty, statutory or otherwise - not stated herein is excluded.

#### 1. INCOTERMS

The international rules for the interpretation of trade terms "Incoterms" shall apply to the commercial terms used herein.

#### 2. CONFIRMATION OF ORDER

Danfoss shall not be deemed to have accepted an order until written confirmation of the order from Danfoss is dispatched to the prospective purchaser. Quotations, pro forma invoices and the like, shall be subject to confirmation by Danfoss.

#### 3. TERMS OF DELIVERY

At Danfoss' option, the goods can be delivered from any of the Danfoss factories, subsidiaries, or affiliated companies in or outside Canada. Failing special instructions, the goods will be dispatched in the way which Danfoss deems best without guaranteeing this to be the cheapest way of transport.

#### 4. PRICE REGULATIONS

Danfoss reserves the right to adjust accepted prices in the event of alterations in rates of exchange, variations in costs of materials, changes in wages, interference on the part of the Government or similar conditions over which Danfoss has no control.

#### 5. PACKING

Disposable packing is included in the price and will not be credited if returned. Reusable packing is not included in the price and shall be returned in accordance with Danfoss' instructions at purchaser's expense.

#### 6. RISK

From the moment of delivery the purchaser shall bear all risks for the goods, and Danfoss shall not be responsible for loss and damage incurred during the transportation. If so desired by the purchaser, Danfoss will at the cost of and on behalf of the purchaser, effect marine Insurance in English all risk conditions from warehouse to warehouse, at the c.i.f. value of the goods plus 10% and, likewise, Danfoss will effect war risk insurance.

#### 7. TERMS OF PAYMENT

Where payment is not received when due, an interest rate of 10% per annum over and above the actual total back charge will be payable. This rate of interest will also be used in cases where an extension of the period of credit has been granted. The purchaser shall not be allowed to retain payments, or to settle debts by setting off same against possible counterclaims, disputed by Danfoss, or to reduce the invoiced price.

#### 8. TRANSFER OF OWNERSHIP

Until full payment for the goods has been received by Danfoss, the goods shall remain the property of Danfoss and shall not be pawned or pledged in any way.

#### 9. TIME OF DELIVERY

Time of delivery is stated approximately. Danfoss shall not be liable for any delay due to causes beyond Danfoss' control, including

but not restricted to strikes, lockouts, labour disturbances or the like, or in consequence of extraordinary measures on the part of government, hindrances to transportation including ice or other transport difficulties, delayed, incomplete or defective delivery of material ordered in due time from sub-suppliers, failing supply of electricity and similar obstacles to production, fire or workshop accidents at own factories or at sub-suppliers.

#### **10. INFORMATION**

The information and technical data contained in catalogues, leaflets and other written material constitutes an approximate guide only. No responsibility for errors or wrong interpretation can be placed on Danfoss. The purchaser cannot claim any rights based on this material. Such reservation shall also apply to suggestions, advice and other services rendered to customers, including installation and servicing instruction for the product delivered.

#### 11. ALTERATIONS

Danfoss reserves the right to make alterations to their products without notice, also to products already placed on order.

#### **12. WARRANTY**

Danfoss warrants its products to be free of defects in material and workmanship for a period of time from the shipment to the original purchaser, assuming proper installation, proper maintenance, and normal operating conditions. Unless otherwise stated, Danfoss' obligation under this warranty shall be limited to repairing at its factory any part or parts thereof which shall be returned to its factory with transportation charges prepaid, and which upon examination shall appear to Danfoss' satisfaction to have been defective. Danfoss does not cover the cost of removal, freight, delivery and re-installment of the product. Correction of such defects by repair or replacement shall constitute fulfilment of all obligations to purchaser under this warranty. There is no other express warranty. Danfoss shall not be liable for incidental, consequential, or special damages arising from or in connection with the product use or performance. Danfoss assumes no liability of expenses of repairs made outside of its factory except by express written contract. This warranty supersedes all prior warranties.

Further information regarding the specific warranty details and period for each Danfoss product line can be found online and in the instruction manual and/or warranty card included with the product."

### **13. SECONDARY DAMAGES**

Danfoss shall not be held responsible for any indirect or consequential damage e.g. damages to person or property, consequential loss, including loss of production, loss of profit, loss on goods in store or the like, which might arise out of defects and/or delay in delivery of the products sold, irrespective of the cause, including faulty manufacture, design of material.

#### **14. NOTICE OF CLAIMS**

Any claim or complaint as to defects and/or delay in delivery of the products shall be submitted in writing by the purchaser to Danfoss immediately.

## General Conditions for Sale & Warranty
