for New & Existing Vinyl Siding

DBVM1C

for Textured Surfaces, Rigid Siding

DBVR1C

for Retrofit Flat Surfaces including brick

DHB1W

for New Brick in brown or white

With **IN BOX™** there are no extra parts to purchase or handle. You'll save big on labor and materials.

One-piece **IN BOX**, the recessed electrical box for exterior use, eliminates installing multiple pieces – an electrical box, bubble cover assembly and a siding block on siding. And the job looks great because **IN BOX** installs *in the wall* – so less shows outside. It's that simple.

Cost savings. Time savings.

A great-looking job. Get it all in Arlington's one-piece IN BOX!

- Non-metallic, 22.0 cu. inch electrical box with **extra-duty** weatherproof-while-in-use clear or white cover
- Single and two-gang, vertical and horizontal, for a variety of applications 
- For new and old work
- Accepts single-gang devices - no gaskets required

Installs in the wall. Less shows outside!
