SIEMENS

SIEMENS

Furnas brand Definite Purpose Controls

Siemens Energy & Automation, Inc. is dedicated to providing complete electrical, engineering and automation solutions, along with the right products, software and services to our clients worldwide. Our customers include some of the world's largest and most respected companies in the industrial, manufacturing and construction industries, retailers, and leaders in the emerging e-business sector, among others.

Our dedicated team of more than 12,000 engineers, designers, field service technicians and diverse professionals are experts in their fields, and draw on the global support and expertise of over 400,000 professionals at Siemens-affiliated companies worldwide. Backed by annual research and development expenditures in excess of \$52 million per year, the professionals at Siemens Energy & Automation are uniquely positioned to help your organization accomplish its goals faster, smarter and more cost-effectively than you ever imagined possible.

In 1996 Siemens expanded its expertise and product line in the Industrial marketplace with the purchase of Furnas Electric Company. Furnas has long been recognized as both the market share and innovation leader in the definite purpose and HVAC controls business. The Furnas brand, now under the Siemens umbrella, still stands for the same quality as it did when it entered the definite purpose market nearly 50 years ago. By continuing to rely on the latest technologies in engineering, design and manufacturing, Siemens Energy & Automation ensures the Furnas brand will continue to be the foremost definite purpose products available.

Common Definite Purpose applications include:

- | | |
|--------------------------------|-----------------------|
| ■ Air Conditioning | ■ Elevators |
| ■ Heating | ■ Lighting |
| ■ Ventilating | ■ Pool and Spa |
| ■ Refrigeration | ■ Welding |
| ■ Food and Beverage Industries | ■ Pump and Compressor |
| ■ Hoist and Cranes | ■ Conveyors |

Class 45 Definite Purpose Contactor Features

- Compact Size
- Weld-resistant Silver Cadmium Oxide Contacts
- Reinforced Thermoset Polyester Housing
- Quiet Operation
- Contact Covers and Taped Coils are Standard
- Power Terminations options:
 - Lugs
 - SEMS clamp
 - Binding Head screws (standard)
 - Quick Connects (standard)
- Standard Class B Coil Insulation
- Contact Covers Available for Increased Protection
- One Pole Version Includes Jumper Bar
- Replacement Coils and Contact Kits Not Available for this Class
- Meets:
 - ARI – 780
 - UL File E14900
 - CSA File LR6535
 - CE Approved

Replacement coils are standard VA coils with screw terminals.

Replacement coils with quick connects are available for 25-60 amp contactors. Contact Sales Office for part number.

Replacement Parts

Contact Kits (Contains 1 Complete Pole)

Class 16, 42

Third Character of Cat No	Fourth Character of Cat No	Catalog Number	Price
A	F	75AF42	\$ 24.00
B	F	75BF42	\$ 24.00
C	F	75CF42	—
D	F	75DF42	\$ 56.00
E	F	75EF42	\$ 64.00

Overload Relay Heater Tables Class 16 Starters, Class 48 Overloads

Selection of Heater Elements for Overload Relays

Overload relays do not provide protection against short circuits. To insure proper coordination with short circuit protective devices, select heaters from the information packaged with the control.

Selection Instructions

To select the proper heater follow the steps below:

1. Choose the proper table using the size, trip type, and number of poles ①

Ambient Compensated Bimetal Heater Element Tables

Class	Size		Standard Trip (Class 20)		Quick Trip (Class 10)	
	FLA	3rd Letter of Catalog No.	E Heaters Green Reset		K Heaters Green Reset	
			2 Poles	3 Poles	2 Poles	3 Poles
16	25 - 90	A - G	295	297	395	398
	120 - 150	H - I	—	299	—	393

2. If you do not know the trip amps, use the motor FLA to calculate the trip amps by multiplying the FLA by a factor of 1.15 ②
3. Match the trip amps of your starter to the trip amps value below the starter size of the appropriate table. The choice should be as close as possible but NOT greater than the selected trip amp value in the table to allow for proper protection.
4. Select the proper heater from the last column and order the appropriate number of heaters (single phase requires at least two, three phase requires at least three).

Examples

Starter	Size Starter	Phase	Trip	Heater Table	Motor FLA	Trip Amps	Heater Element
16CF15AF8	40	Single	Standard	295	35	40.25	E69
16EF35AF4	60	Three	Quick	398	56	64.40	K77

① 5th character in the catalog number equals 1 for single phase 2 pole or 3 for three phase 3 pole.

② For 40 degrees C motors, the maximum Trip Amps are 115% of the Motor FLA or TRIP AMPS = FLA*1.15.

This cross reference does not purport to cover all details or variations in equipment, nor to provide for every possible contingency to be met in connection with installation, operation, or maintenance. Should further information be desired or should particular problems arise which are not covered sufficiently for the purchaser's purposes, the matter should be referred to the local Siemens Energy & Automation Controls sales office.

The contents of this cross reference shall not become part or modify any prior or existing agreement, commitment or relationship. The sales contract contains the entire obligation of Siemens Energy & Automation, Inc. The warranty contained in the contract between the parties is the sole warranty of Siemens Energy & Automation, Inc. Any statements contained herein do not create new warranties or modify the existing warranty.
