

The Makita Cut-Out Saw Blade is the right accessory for straighter, more accurate cutting in installed drywall. When used with the Makita 18V LXT Lithium-Ion Cordless Cut-Out Saw (XDS01Z, sold separately), the B-49703 blade is ideal for cut-outs and repair applications. The blades have depth markings for easier adjustments, and will cut drywall board up to 1-3/16" thick. For longer performance life, the blades are constructed with durable High Carbon Steel (HCS).
