

TECHNICAL DATA

Specification

Diameter	4"
----------	----

Length	2.625"
--------	--------

Shank Diameter	0.0
----------------	-----

BENEFITS

Wave design transfers energy to bit more effectively for up to 40 percent faster drilling versus previous design

Carbide-tipped centering bit

Asymmetrical carbide teeth for faster cutting, longer life

All-in-one core transmits power directly to the end of the bit

Maximum core size is 2-5/8 In. deep
