

The Wrecker™ Multi-Material SAWZALL® Blade 9 In. 7/11TPI 5 pk

Bust right through wood studs, embedded nails and drywall when you use a Milwaukee® 9-in. 8 TPI The Wrecker™ Sawzall® Blade in your tool. A blade from this 5-pack can cut through plastic, non-ferrous and ferrous metals and much more so, there's no need to swap tools if you encounter an unusual material. Turn your Sawzall into a demolition machine by loading these 1-inch tall reciprocating saw blades that stays straight during both the in and out strokes of the cut. This height pairs up with extra thickness to prevent the reciprocating saw blades from twisting and bending. Each one of these wood cutting blades features a special unset raker tooth at the tip that makes accurate plunges to prevent them from skipping over the surface. The teeth on these Milwaukee 9-Inch Wrecker Sawzall Blades include both extra sharp cutting edges and Matrix II bi-metal material to help them stay sharp longer.
