

## Voltec 08-00730 Details

Choose reliability and longevity with this Voltec 08-00730 LED work light with dual heads, extendable tripod, and removable sled base. This high power LED light features dual heads, each with a 6600 lumen bulb rated for 72W. The heads' ergonomic handles with non-slip grip makes them easy to carry with you around any jobsite. It also boasts a rugged die-cast aluminum housing that makes it ideal for even the toughest of work environments, and a simple on/off switch for ease of use.

The tool-free head adjustment function allows you to change the position of the heads to the most optimal angle for you. It is built with 2-in-1 extendable tripod legs/removable sled base. The tripod extension legs give the light additional height and added balance. The sled base can be removed from the tripod and used on its own to provide sturdy foundation, ensuring that the light will remain steady while you work. The base also features a handle with a non-slip grip so that both heads can be carried at once. This work light is built with a 5-15 NEMA plug, and includes a 5' 18/3 SJTW cord, giving you slack to move through various locations in your work area. Perfect for temporary workspaces, long-term use on jobsites, and even large-scale events, this light will illuminate your work area.
