

10-1/4 in. 28T Framing Circular Saw Blade

Milwaukee's wood cutting, framing blades maximize life and cutting efficiencies to improve your productivity. An anti-friction coating keeps the blade cool while cutting and resists corrosion & gummy. Laser cutting technology creates the blade from 100% sheet steel to ensure a stable blade that increases cutting accuracy. 10-1/4 in. blades are ring tensioned to further stabilize the blade. Laser cut vibration slots minimize wobble and warping during use. A thin Kerf design delivers faster, more efficient cuts.
