

7-1/4 in. 40T Fine Finish Circular Saw Blade

Milwaukee's wood cutting, fine finish blades provide cleaner cuts and cutting efficiencies to improve your productivity. An ATB tooth pattern minimizes tear out in the cut material. An anti-friction coating keeps the blade cool while cutting and resists corrosion & gumming. Laser cutting technology creates the blade from 100% sheet steel to ensure a stable blade that increases cutting accuracy. Laser cut vibration slots minimize wobble and warping during use. A thin Kerf design delivers faster cuts as well as more cuts per charge when using a cordless tool.
