

12 PK Cut Level 1 Insulated Winter Dipped Gloves

Our 12 pack of small ANSI Cut Level 1 Winter Insulated work gloves are designed to provide ultimate warmth, all-day comfort, and best in class dexterity for handling small objects. The insulated winter work gloves utilize a warm acrylic terry liner to maintain warmth in the coldest outdoor conditions. The gloves have a secure dual thermal liner to comfortably keep your hands warm without the liner separating after extended use on the job site. These gloves feature a 15 gauge nylon outer liner resulting in high dexterity fingertips and breathability. Our cut resistant work gloves are ideal for material handling, general purpose and remodeling applications. Our gloves are constructed of ½ double-dipped latex palm microfinish for water resistance to provide best in class grip performance in the coldest temperatures.
