

9 in. 14 TPI THE TORCH™ SAWZALL® Blade (25 Pack)

The Milwaukee 9-Inch Super Sawzall™ Torch™ Blade features the Double Duty Upgrade™ with a row of 126 fine teeth to cut through tough metal projects and leave a smooth, professional finish. There's 25 durable blades in this package, and each offers a long life so you can finish many projects before you need more. The Tough Neck™ reinforcing ribs surround and protect the tang from shattering for safety and durability, and a unique Grid Iron™ pattern stamped throughout the metal cutting blade body prevents curving for more exact results. For maximum convenience the 1/2-inch shank on these blades makes them usable with any reciprocating saw. A Torch blade combines rigidity for straight cuts with a 9-inch length to reach where shorter blades can't go.
