

## 9 in. 18 TPI THE TORCH™ SAWZALL® Blade (25 Pack)

This Milwaukee 9-Inch The Torch Sawzall® Blade features the double duty upgrade with a row of 252 very fine teeth to cut through tough projects, and its grid iron, a honeycomb pattern stamped throughout the structure, increases the rigidity and precision of the metal-cutting blade. The 1/2 in. shank is universal so you can use this blade in most reciprocating saws. The tough neck ribs reinforce the reciprocating saw blade tang to reduce shattering. With 25 blades included in the pack, you're sure to have more on hand when you finally need a replacement blade and can always finish the job. A Torch metal-cutting blade provides high durability with the profile to get the exact and straight cuts that you need.
