Audio speaker alerts user to warning type and location within the home

#### THREE COLOR LED

Green, yellow and red LED illuminates to show unit's current status.

Fire Alerts

Carbon Monoxide (CO) Alerts

Weather Warnings

Intruder Alert (when used with camera)

#### PRODUCT DESCRIPTION

Kidde's RemoteLync Bridge is an innovative home safety device that can provide enhanced fire protection information from Kidde P4010 Wire-Free Interconnect Alarms to your smart phone app, and includes additional home safety capability.

The RemoteLync Bridge not only notifies your smartphone of a smoke or carbon monoxide (CO) event, but can also communicate additional information from an alarm to the app such as battery life information, and connectivity status.

User-defined emergency weather alerts can be sent from the Bridge to the alarm network, announcing "weather emergency in vicinity," at each alarm location. This feature could be especially beneficial for sudden events such as flash floods or tornado warnings, and can be adjusted or turned off to suit individual preferences.

Home security protection can be added with use of the Kidde RemoteLync Camera. Once triggered, a camera will send an alert to the Bridge, and each alarm in the home will announce, "Motion Detected in (the room or location the camera is installed)."

*Note: Intruder and weather alerts require Wi-Fi connection.*

#### ONE DEVICE TO CAPTURE MULTIPLE THREATS

Integrates the features of Kidde P4010 Wire-Free Alarms and RemoteLync Camera to provide warnings of fire, security, and other threats from a single platform of devices.

#### CONNECTED DEVICES COME TOGETHER IN EASY-TO-USE REMOTELYNC APP

- Receive alerts away from home
- Assign room location to devices
- Temporarily silence nuisance alarms\*
- Receive smoke sensor health and battery information
- Personalize weather alert severity and other user options

*\*Nuisance alarms cannot be silenced remotely or if smoke is too dense.*

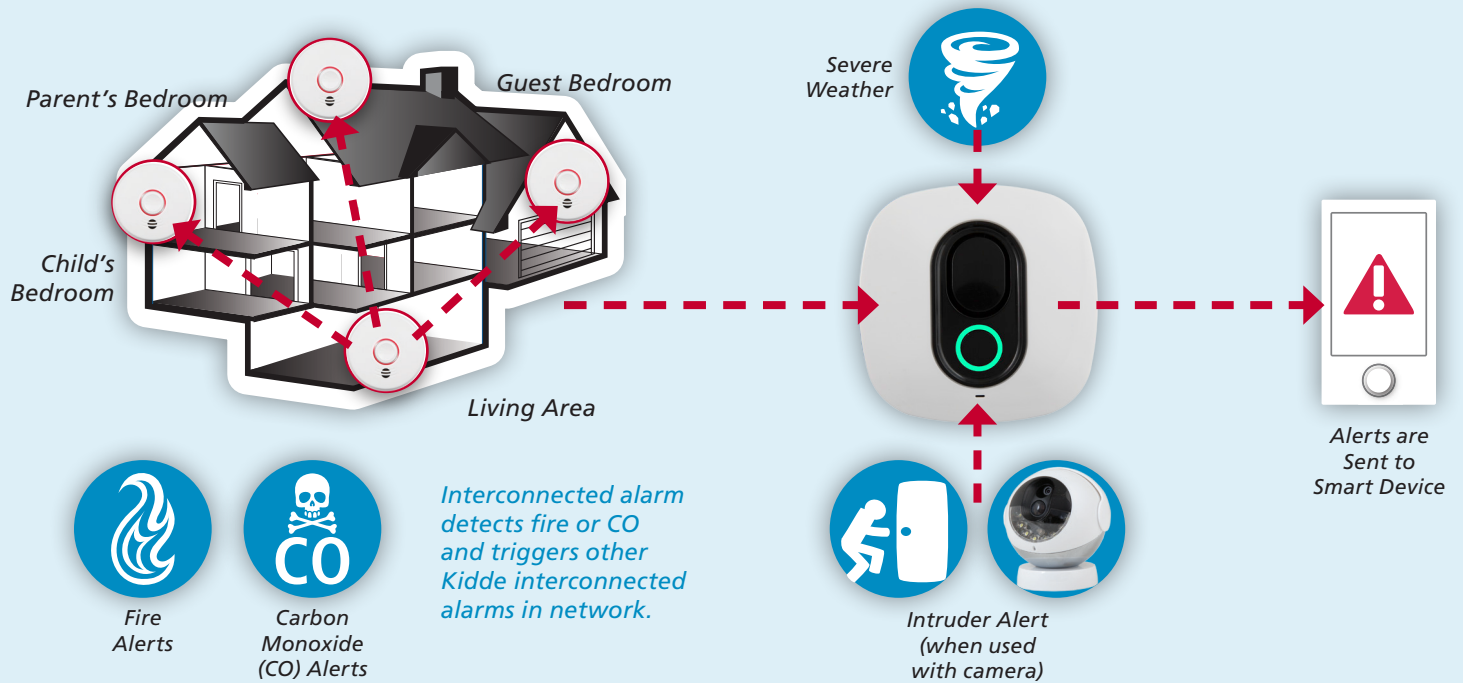

#### EASY TO INSTALL — NO MONTHLY FEES

Kidde's RemoteLync Bridge wirelessly connects to your home Wi-Fi network and is powered by a standard AC outlet. Compatible Kidde devices can be connected via the RemoteLync App. There are no service contracts or monthly fees required.
