

This 34 pc. Socket Set is a versatile set that can be easily transported between work areas. This set features a removable inner tray designed to fit in most tool chests with standard height drawers. It also has side hinges that interlock with similar DEWALT(R) mechanics tool sets for an organized storage solution. Included in this set is a 72 tooth count ratchet, great for accessing tough to reach spots found on a worksite. The sockets and wrenches have hard stamped markings to easily identify the tool you need.
