

THE GOLD STANDARD IN IMPACT DRIVING

Standard insert bits are lagging behind the increased fastening power of high torque impact drivers, and the result is more broken bits and more wasted time for contractors. Impact GOLD® is the new Gold Standard in impact driving, with high quality steel for extra strength and Xtreme Torsion Technology which allows the torsion section of the bit to flex under load and take pressure off of the tip for longer bit life. Impact GOLD® is exclusively designed for use with high-torque impact drivers, and is engineered to last up to 60x longer than standard insert bits and fastening accessories. Impact GOLD® offers an expanding line of insert bits and bit holders as well as double-ended power bits, nutsetters, impact sockets and socket adapters.
