

12-Piece SAWZALL® Blade Set

The 12-Piece Sawzall Blade Set from Milwaukee features a variety of blades for your different project needs. The Wrecker reciprocating saw blade is ideal for general-purpose demolition. Torch blades have fine teeth to cut metal with ease. Ax blades have Nail Guard to cut through nailed boards without shattering. The Sawzall blade set uses Matrix II bi-metal design for both cutting power and durability. Tough Neck ribs throughout the blades reinforce the tang to minimize broken blades in the middle of a job. The blades with Fang Tip technology bite into the cutting surface to save you time and prevent skipping that mars your work piece. This entire set comes with a reusable case that holds blades up to 9-in. long.
