

AutoCutPL[®]

Plastic Tubing Cutter

The compact, convenient AutoCutPL[®] plastic tubing cutter is an easier way to cut plastic tubing. It makes clean, uncrushed, square cuts quickly – and with less effort!

It fits in the palm of your hand. Great for easy use in tight spaces, AutoCutPL lets you cut both PEX and CPVC-CTS plastic tubing with less than one inch of clearance!

Just remove the blade guard and close the gate over the tube. Then turn AutoCutPL in the direction of the arrows as you evenly squeeze the gate closed. Easier to use than conventional plastic tubing cutters, it cuts plastic tubing in as little as one rotation! You get a clean uncrushed, square cut – with no burs!

Get hundreds of cuts with accuracy and ease. The handy blade guard protects your fingers – and the easily replaceable AutoCutPL blade – from workplace and toolbox damage.

AutoCutPL comes in three sizes - 1/2", 3/4", and 1" - for PEX and CPVC-CTS tubing. Keep all three in your toolbox!

Stub-Out Work

Cut tubing closer to the wall than conventional plastic tubing cutters because there's no handle to get in the way.

Features:
