

# PRO HiSPEED DRY CORE BIT

**CONFIGURATION:** SEGMENTED  
**DIAMOND RATING:** +  
**WELD TYPE:** LASER  
**APPLICATION:** BRICK  
 BLOCK  
 CONCRETE  
 CONCRETE WITH LIGHT REBAR

- HI-SPEED BIT TECHNOLOGY FOR EXTREMELY FAST DRY DRILLING
- USE WET OR DRY

The Beast/B+BTec HiSpeed bit technology provides extremely fast dry drilling in a variety of aggregates. They are most popular for use in horizontal drilling through brick or block walls in waterproofing, restoration, plumbing, electrical applications and more. The Beast/B+BTec HiSpeed Dry Core Bits can be used in light aggregate, non-reinforced concrete but NOT approved for use with hard aggregate or reinforced concrete. They work well with our dry drilling kit to provide dustless drilling (when combined with HEPA certified vacuum).

ITEM	DIAMETER	DRILLING DEPTH	ARBOR	SEG/RIM HEIGHT
DCB114HS	1-1/4"	13"	1-1/4"-7 Thread	9mm
