

Product Dimensions: 3.3" H x 1.95" W x 1.95" D

This Programmable Light Control is perfect in laundry rooms, garages, basements, attics or any area indoors or outdoors where you need light. This device converts any light socket into a programmable night light that automatically turns on in low light conditions, adding safety and security to any space. The light will turn off at a selectable time of 2, 5 or 8 hours; it can be set to turn off at random times to discourage intruders. Integrated micro-processor ensures more accurate off-timing. Easy installation; screw the sensor into any existing light socket, then install a bulb up to 100 Watts into the control. Compatible with LED, incandescent, and CFL bulbs.

- NIGHTLIGHT CONTROL - convert any lamp into a nightlight; perfect nighttime lighting solution for hallways, entryways, basements, bathrooms and more
- PROGRAMMABLE - choose between timer settings of 2, 5 or 8 hours, dusk to dawn or random; great way to deter intruders
- MODERN STYLE - contemporary white finish and sleek design makes this a perfect accent that works with any décor
- EASY INSTALLATION - screw the sensor into any existing light socket, then install a lightbulb of choice up to 100 Watts; compatible with incandescent, compact fluorescent and LED bulbs
