

NSI Industries TPS200C Platinum Tools PoE Tester
Platinum Tools PoE Tester

- Measures DC voltage from 3.5 to 56 volts, and power up to 280 watts; also tests up to 4-pair PoE (IEEE 802.3bt Type 3)
- Test power inline with a PoE device or use tester in Powered Device (PD) Simulation mode to test power before attaching a powered device
- Easy-to-read, bright, scrolling OLED display
- Test PoE on active data cables without interrupting data flow
- Tester features dual RJ45 ports for testing PoE and dual 2.1x5.5mm DC jacks for testing DC power supplies. Includes 2.1x5.5mm DC patch cable
