

Product Specifications

1/4" x 4" Carbide Tipped Masonry Drill Bit

Part number MD2
Category number 6320
UPC 781002302100

Masonry Drill Bits are designed for use in brick, concrete, slate, and cinder block. They are manufactured with a tungsten carbide tip for precise drilling and a tempered body for increased bit longevity. They are suitable for both rotary or percussion drilling.

Physical Characteristics

| | |
|---------------------|------------------|
| Type | Masonry Drill |
| Shank Type | Straight |
| Shank Size (in) | 1/4" |
| Chuck Size (in) | 3/8" |
| Bit Diameter (in) | 1/4" |
| Overall Length (in) | 4" |
| Material | Carbon Steel |
| Tip Material | Tungsten Carbide |
| Finish | Black Oxide |
| Number of Flutes | One |

Performance Data

| |
|---|
| Applications |
| Brick |
| Concrete |
| Tile |
| Slate and Cinder Block |
| Special Features |
| Heat Treated, Tempered Body for Long Life |

Packaging Details

| | |
|----------------|------|
| Standard Qty | 1 |
| Master Qty | 10 |
| Price Per | 1 |
| Package Length | 5.5 |
| Package Width | 1.5 |
| Package Height | 0.25 |
| Package Weight | 0.04 |
| Net Weight | 0.04 |

Certifications

| | |
|----------------|-----|
| RoHS Compliant | Yes |
