Description

Single-Pole Switch,
2-Pole 3-Wire Receptacle; NEMA 5-15R, 5-20R
1W Nightlight
120V/AC

Design features

- Nightlight is dimmable to desired setting
- Nightlight is controlled by a photo sensor that turns on in the dark, off in light
- Easily disable photo sensor for Hi/Med/Low/Off settings
- Tamper resistant shutters provide compliance with 2014 NEC® Article 406.12 that states that all 15A and 20A, 125V receptacles installed in dwelling units must be tamper resistant (TR7735 and TR7736)
- Automatic grounding system eliminates need for bonding jumper in grounded metal enclosure, provides redundant measure of ground continuity where jumper is used
- Thermoplastic top and back-body are virtually unbreakable to deliver years of durable performance
- Steel mounting strap is zinc-plated for added corrosion resistance
- Ultrasonic welding and integrated construction of the strap and body provide superior ground integrity even under heavy use
- Convenient built-in wire strippers speed installation
- Backwire clamps on side terminals provide for easy installation of #12 and #14 AWG
- Triple wipe blade contacts and double wipe ground contacts to ensure long-term plug retention (TR7735 and TR7736)
- Tri-combo screw heads offer greater installation flexibility

Applications

Arrow Hart's patrol line of dimmable wallbox nightlights is the only combination nightlight device on the market that allows for dimming to set the perfect level of light desired. Patrol offers improved way finding and safe navigation in dimly lit rooms and the nightlights are also automated, using a light-sensor to automatically turn the nightlight ON and OFF. The patrol nightlight series has many possible applications in both residential and commercial settings including bedrooms, bathrooms, kitchens, children's rooms, hotel rooms, dormitories and assisted living facilities. The 7737 full nightlight devices can also be wired in a series and controlled by a switch for applications such as hallways or stairways.
