

CARBIDE TIPPED HOLE SAWS

Tungsten carbide tooth tips offer the highest wear resistance possible for fast holes and longer life cutting abrasive materials. Cutting depth of 1 15/16". Arbor required.

BENEFITS:

Special tooth design for very fast hole saw cutting

Ground and set teeth help to cut materials that bi-metal saws will not cut

3 teeth per inch creates a wider gullet for better chip clearance and faster cutting

APPLICATIONS:

Acoustic tile

Countertops

Drywall

Fiberboard

Fiberglass

Plaster

Plastic

Nail-free wood
