

TUNGSTEN CARBIDE GRIT HOLE SAWS

Long-lasting choice for very hard abrasive materials. These hole saws create clean holes in materials too hard or abrasive for standard bi-metal saws, or so thin they would strip bi-metal or chip carbide teeth. Cutting depth of 1-15/16". Arbor required.

BENEFITS:

- Super resistance to heat, wear and abrasion with shock resistant back

- Tungsten carbide grains are bonded to alloy backs with a gulletted snag resistant edge

- CT pilot drill recommended for masonry type materials

APPLICATIONS:

- Acoustic tile

- Brick

- Cast iron

- Cement board

- Ceramics

- Cinderblock

- Composites

- Computer flooring

- Fiberglass

- Hardened steel

- Particleboard

- Asbestos board

- Formica
