

## SAWZALL® Reciprocating Saw Kit

The Milwaukee® Sawzall® Recip Saw Kit is ready to cut up all common trade materials right out of the box. This Sawzall reciprocating saw runs on a strong 12-amp motor and makes up to 3,000 strokes per minute. Its counterweight mechanism reduces vibrations, which prevents damage to the internal components and increases precision for better-looking results. This Milwaukee reciprocating saw features a stroke length of 1-1/8 inches, which dramatically improves its cutting speed. The gear protecting clutch absorbs the impact of lock-ups to prevent any damage to the gears. Its Quik-Lok® keyless blade clamp allows you to make fast and easy blade changes for when you move from wood to metal or need to replace a broken blade. An ergonomic grip reduces hand strain.

## FEATURES

---

Milwaukee Sawzall Reciprocating Saw Kit includes saw and carrying case

12-amp motor cuts at a fast 3,000 SPM

Sawzall reciprocating saw's counterweight mechanism reduces vibration for extended life and beautiful results

1-1/8-inch stroke length provides outstanding cutting speed

Milwaukee reciprocating saw's gear-protecting clutch absorbs impact energy to keep the gears in working order

Keyless Quik-Lok blade clamp makes changing the blades fast and easy

Ergonomic grip for easy operation

5-year manufacturer warranty; Made in the USA

Double insulated

Uses standard 1/2 in. shank SAWZALL® blades - blades may be clamped upside down for special cutting needs

Impact resistant carrying case
