

The 60V MAX* 1-9/16 in. Brushless SDS MAX Combination Rotary Hammer is a light weight, high-performance hammer that is powered by a brushless motor and a durable German engineered mechanism. It delivers 6.1 Joules of impact energy for fast drilling and chipping, even in the hardest concrete. The constant speed electronics allow the tool to maintain speed under load. The light weight design makes it ideally suited for horizontal drilling for #3 - #6 rebar dowel applications, dry coring up to 3 in., and chipping in any mid to upper wall and ceiling. This hammer is part of the PERFORM & PROTECT™ product line, integrated with the Anti-Rotation E-CLUTCH® System and the SHOCKS Active Vibration Control® System. E-CLUTCH® shuts down the tool in bind up situations. SHOCKS® reduces vibration felt by the user at the handles, compared to rotary hammers without this feature. This tool comes Tag Ready™ so users and companies can attach the DEWALT Tag™ and track its location virtually anywhere via the DEWALT Tool Connect™ app.

Applications

Chipping in any mid to upper wall and ceiling application.

Dry coring

Includes

(1) DCH481 60V MAX* Combination Rotary Hammer

(1) 360° Side Handle

(1) (2) FLEXVOLT® DCB609 Batteries

(1) Fast Charger

(1) Kit Box
