

MODEL NO. EZ-2 - Infrared
115 VAC, 1700 WATTS
For Pipe Sizes From 1/2" UP TO 2"

Shipping Box Dimensions:
32" (L) X 10" (W) X 11" (H)
Shipping Weight: 19 LBS.

MODEL NO. EZ-2X - Induction*
115 VAC, 1610 WATTS
For Pipe Sizes From 1/2" UP TO 2"

Shipping Box Dimensions:
35" (L) X 9" (W) X 11" (H)
Shipping Weight: 30 LBS.

INFRARED HEATING

This lightweight portable unit is easily carried to the job site for field bending. The EZ-2 requires the same grounded power source as other portable power tools, and has complete operating instructions with National Electric Code (NEC) bending tables for rigid, non-metallic conduit labeled on the unit. This durable, powder-coated unit is equipped with a heat resistant phenolic cover handle, a carrying handle, and a five foot power cord that stores conveniently on the underside of the unit. This unit is easy to use and is an excellent value.

INDUCTION HEATING

This unit is designed and developed for contractors and manufacturers who need a steady supply of heat softened conduit, in an "assembly line" fashion, while eliminating the need to attend the unit. Controlling the temperature with an adjustable thermostat, several conduits can be kept at the perfect forming temperature, until they are needed. Open at both ends, this unit can heat five sections of 1/2" conduit, or three sections of 3/4" conduit at one time. The maximum size pipe this unit will heat is 2" (2.375" o.d.). The EZ-2X comes completely assembled and ready to operate. Color coded lights indicate the heating cycle and that the power is "on". Complete operating instructions are labeled on this unit.
