MK Morse MHSG80 Description

Long-lasting choice for very hard abrasive materials. These hole saws create clean holes in materials too hard or abrasive for standard bi-metal saws, or so thin they would strip bi-metal or chip carbide teeth. Cutting depth of 1-15/16" (49.2 mm). Arbor required.

MK Morse MHSG80 Includes

- (1) Hole Saw

MK Morse MHSG80 Features

- Patent Pending tooth set design, optimized to remove material faster
- New cap reduces runout and vibration
- Cutting depth increased 18 percent over AV MHSG80
- New side slot, increased leverage for aster, easier slug removal
- New exterior red coating, reduces side wall friction for efficient cutting

MK Morse MHSG80 Specifications

Length	5.4"
Width	2.2"
Height	6.4"
