

6 in. 5 TPI The Ax™ SAWZALL® Blade (25 Pack)

This 25 pack of Milwaukee 6-Inch Reciprocating Saw Blades is ready for any project and can handle wood and even small metal cuts. Make straight cuts with confidence -- the 1-inch reciprocating saw blade body keeps its shape as it cuts for precise results. A bimetal design means hard, sharp teeth for cutting ability and a flexible body for shatter resistance, while the fang tip design allows for extra bite to prevent it from bouncing off the cutting surface, so you can get your job done more quickly than with another model of wood cutting blade. The blade shank is universal and fits into all reciprocating saws. The unique Ax blade design is thicker and more rigid than weaker blades so that you spend your time working, not replacing blades.
