

About the Lenox 1787565

This Lenox 1787565 is a 2-1/4" (hole diameter) Bimetal Self-Feed Bit that features high-speed steel cutting edges, ideal for nail-embedded wood and tough applications. Its bimetal construction allows it to last longer compared to other drilling tools. The chamfered edge and the aggressive lead screw of this self-feed bit make the removal of the tool easier after the drilling. It also helps in producing a clean hole and makes it cut deeper (4" x 4") without an extension on a wood material. Designed with an impact hex shank, it allows a quick replacement of the bit any time you need to do so. In each package of this 1787565 bit, an extra lead screw and a wrench are included. Lenox continues to provide reliable tools like this one for your convenience, without letting you spend a lot of extra effort and time normally associated with lower quality drilling tools.

Product Details

Manufacturer:	Lenox
Product:	Self-Feed Bit
Color:	Black
Material:	Bi-Metal
Tool Type:	Drill bit
Style:	Bits
Shank:	Hex Shank
Diameter:	2-1/4"
Length:	5-1/2"
Mpn #	1787565
Weight	1.83 lbs.
