Instrument Set-up EN

Introduction

The safety instructions and the user manual should be read through carefully before the product is used for the first time.

The person responsible for the product must ensure that all users understand these directions and adhere to them.

The symbols used have the following meanings:

MWARNING

Indicates a potentially hazardous situation or an unintended use which, if not avoided, will result in death or serious injury.

ACAUTION

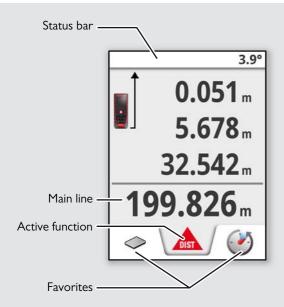

Indicates a potentially hazardous situation or an unintended use which, if not avoided, may result in minor injury and/or appreciable material, financial and environmental damage.

Important paragraphs which must be adhered to in practice as they enable the product to be used in a technically correct and efficient manner.

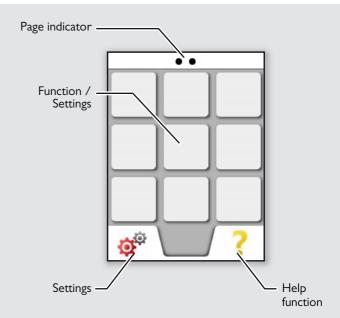

Overview

Basic measuring screen

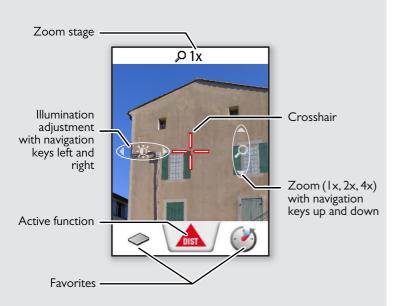

Selection screen

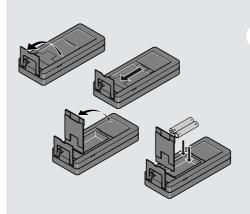

EN

Instrument Set-up EN

Pointfinder (Viewscreen)

Insert batteries

To ensure a reliable use, do not use zinc carbon batteries. We recommend using high quality batteries.

Change batteries when battery symbo is flashing.

Switching ON/OFF

Device is turned OFF.

Clear

Press ON button

2 sec to start

sec, the device

switches off au-

Undo last action.

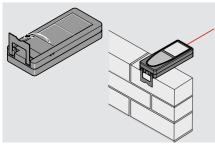

Leave actual function, go to default operation mode.

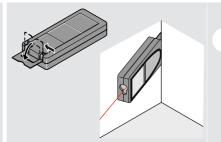

Message Codes

If the info icon appears with a number, observe the instructions in section "Message Codes". Example:

Multifunctional endpiece

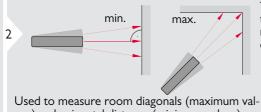

detected and accordingly ad-

Permament / Minimum-Maximum measuring

ues) or horizontal distance (minimum values)

The minimum and maximum distance measured is displayed (min, max.). The last value measured is displayed in the main line.

Stops permanent / minimummaximum measuring.

Operations EN

Add / Subtract

The next measurement is **added** to the previous one.

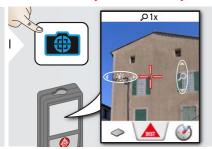

The next measurement is **sub-tracted** from the previous one.

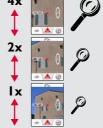

This process can be repeated as required. The same process can be used for adding or subtracting areas or volumes.

Pointfinder (Viewscreen)

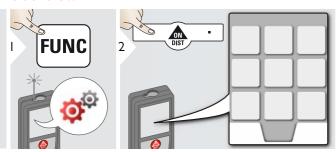

Exit pointfinder (viewscreen).

This is a great help for outdoor measuring. The integrated pointfinder (viewscreen) shows the target on the display. The device measures in the middle of the cross hair, even if the laser dot is not visible.

Parallax errors occur when the pointfinder camera is used on close targets, with the effect that the laser appears displaced in the crosshair. In this case rely on the real laser dot

★ De-/Activate Bluetooth Smart

Exit settings.

Default mode:
Bluetooth is switched on.
Bluetooth icon in status line is displayed if device is connected with

Switch on Bluetooth Smart in Settings.

Connect the device with your smart phone, pad, laptop,...

A blue Bluetooth symbol appears on the laser distance meter if the connection is established.

Bluetooth switches off as soon as the laser distance meter is switched off

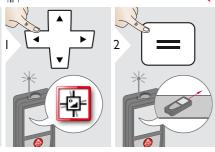

The efficient and innovative Bluetooth Smart module (with the new Bluetooth standard V4.0) works together with all Bluetooth Smart Ready devices. All other Bluetooth devices do not support the energy saving Bluetooth Smart Module, which is integrated in the device.

We provide no warranty for free DISTO™ software and offer no support for it. We accept no liability whatsoever arising from the use of the free software and we are not obliged to provide corrections nor to develop upgrades. A wide range of commercial software can be found on our homepage. Apps for Android® or Mac iOS can be found in special internet shops.

For more details, see our homepage.

Leica DISTO™ E7500i 792324 **[0**

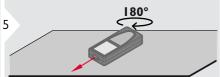

Calibration of tilt sensor (Tilt Calibration)

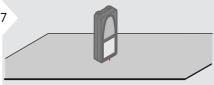

Place device on absolutely flat surface.

Turn the device horizontally by 180° and place it again on absolutely flat surface.

Place device on absolutely flat surface.

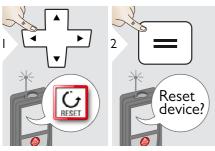

Turn the device horizontally by 180° and place it again on absolutely flat surface.

After 2 sec the device goes back to the basic mode.

Reset

Second confirmation with selection keys:

Refuse: Confirm:

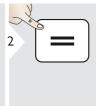

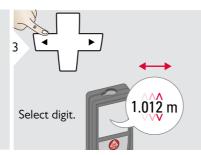

Exit settings.

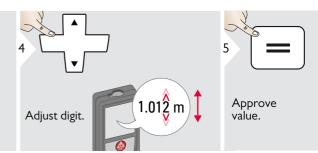

Reset returns the instrument to the factory settings. All custom ized settings and memories are lost

Exit settings.

An offset adds or subtracts a specified value automatically to or from all measurements. This function allows tolerances to be taken into account. The offset icon is displayed.

	Pythagoras 2	

Timer

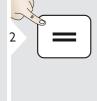

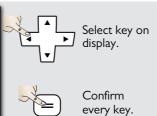

The self release starts if ON/Measure key is pressed.

■ Calculator

The measurement result from the main line is taken over to the calculator and can be used for further calculations

Ft/in fractions are converted into Meters.

Adjusting measuring reference/tripod

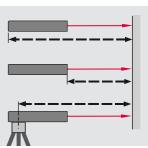

Distance is measured from the rear of the device (standard setting).

Distance is measured from the front of the device (lock symbol = permanently).

Distance is measured from the tripod thread permanently.

EN

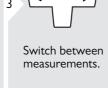

Confirm setting.

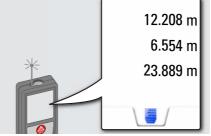

If device is switched off, reference goes back to standard setting (rear of the device).

Memory

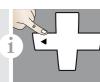

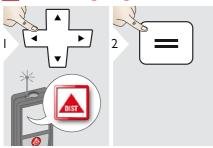

Use Up/Down navigation keys to show more results.

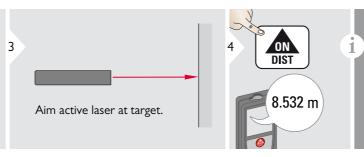

Short cut

FUNC Functions **EN**

Measuring single distance

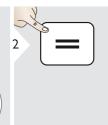

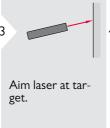

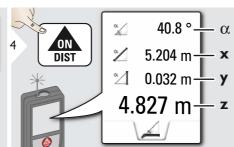

measuring to colourless liquids, ble surfaces or when aiming at high gloss surfaces. Against dark

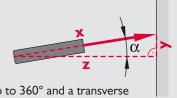

Smart Horizontal Mode

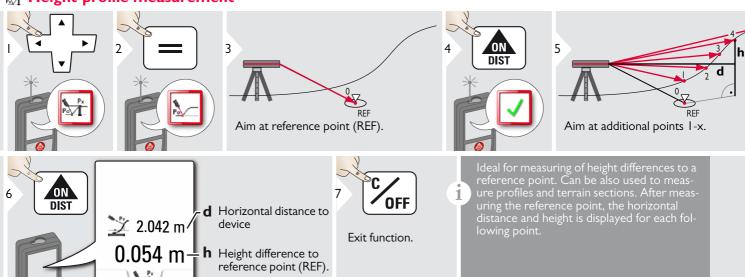

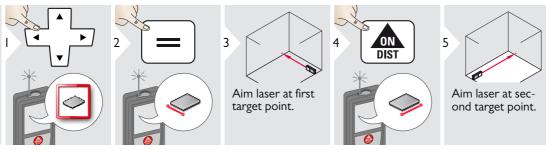

(up to 360° and a transverse tilt of $\pm 10^\circ)$

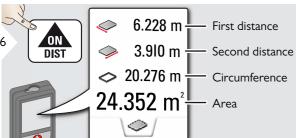

Height-profile measurement

PAT

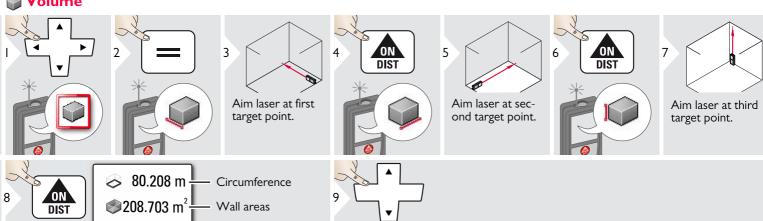

The result is shown in the main line and the measured value above.
Partial Measurements / Painter function:
Press + or - after starting the first measurement. Measure and add or subtract distances. Finish with DIST. Measure 2nd length.

Use Up/Down navigation keys to

show more re-

sults.

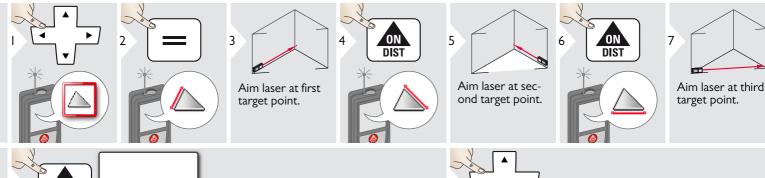

34.224 m²

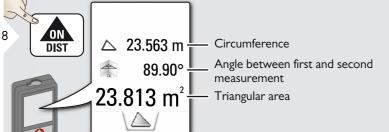

78.694 m³

Ceiling/floor area

Volume

△ Triangular area

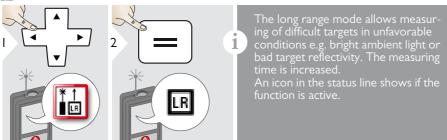

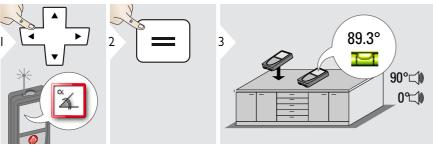

Use Up/Down navigation keys to show more results.

Long range mode

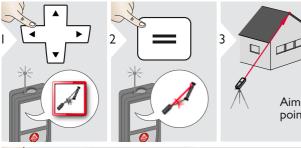

Leica DISTO™ E7500i 792324 **[9**

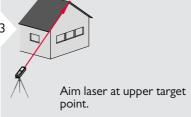

ၗ Inclination tracking

Inclination is permanently displayed. Instrument beeps at 0° and 90°. Ideal for horizontal or vertical adjustments.

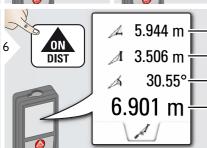

Sloped objects

Horizontal distance between both points

Vertical height between both points

Included angle between both points

Distance between both points

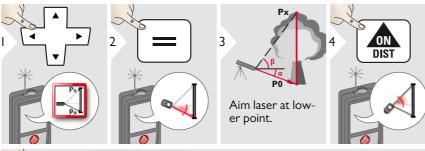

Use Up/Down navigation keys to show more results.

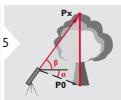

Indirect distance measuring between 2 points with additional results. Ideal for applications such as length and slope of roof, height of chimneys

It is important, that the instrument is positioned in the same vertical plane as the 2 measured points. The plane is defined of the line between the 2 points.

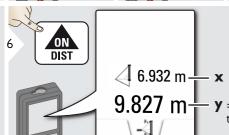

Leica DISTO™ E7500i 792324 **20**

Height tracking

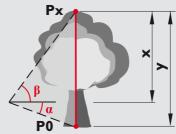

Aim laser at upper points and angle/height tracking starts automatically.

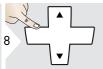

y = Tracking height if device is turned on tripod

Stops height tracking and displays last measurement.

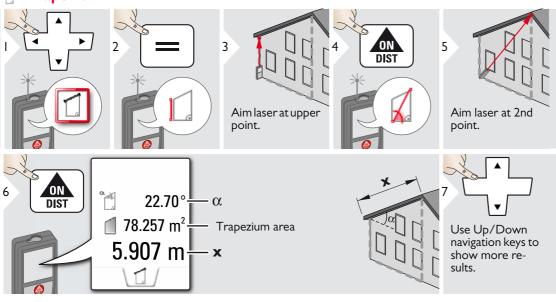

Use Up/Down navigation keys to show more results.

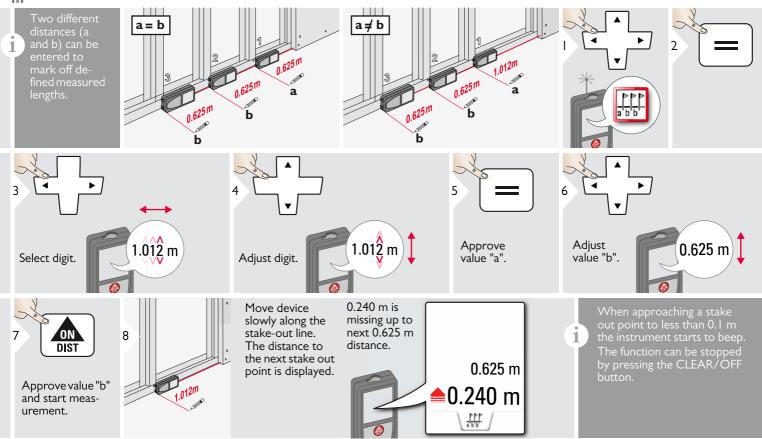

Heights of buildings or trees without suitable reflective points can be determined. At the bottom point, distance and tilt is measured - which needs a reflective laser target. The upper point can be targeted with the pointfinder / crosshair and does not need a reflective laser target as only the inclination is measured.

Leica DISTO™ E7500i 792324

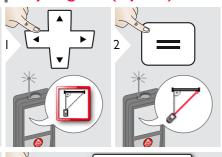

Trapezium

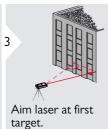

Stake out

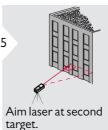

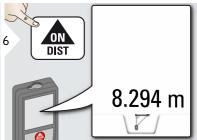

Pythagoras (2-point)

Use Up/Down navigation keys to show more results.

The result is shown in the main line.

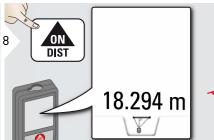

Pressing the measuring key for 2 sec in the function ac tivates automatically Minimum or Maximum measurement.

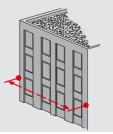

We recommend to use the pythagoras only for indirect horizontal measuring.

For height measuring (vertical) it is more precise to use a function with the incliantion measuring.

Pythagoras (3-point)

Use Up/Down navigation keys to show more results.

The result is shown in the main line. Pressing the measuring key for 2 sec in the function activates automatically Minimum or Maximum measurement.

We recommend to use the pythagoras only for indirect horizontal measuring.

For height measuring (vertical) it is more precise to use a function with inclination measurement.

Leica DISTO™ E7500i 792324

Technical Data EN

Distance measurement	
Typical Measuring Tolerance*	± 1.0 mm / ~1/16" ***
Maximum Measuring Tolerance**	± 2.0 mm / 0.08 in ***
Typical Range*	200 m / 660 ft
Range at unfavourable condition ****	80 m / 260 ft
Smallest unit displayed	0.1 mm / 1/32 in
Power Range Technology [™]	yes
Ø laser point at distances	6 /30 / 60 mm (10 / 50 / 100 m)
Tilt measurement	
Measuring tolerance to laser beam*****	± 0.2°
Measuring tolerance to housing*****	± 0.2°
Range	360°
General	
Laser class	2
Laser type	635 nm, < 1 mW
Protection class	IP65 (dust tight and jet water protected)
Autom. laser switch off	after 90 s
Autom. power switch-off	after 180 s
Bluethooth® Smart	Bluethooth v4.0
Battery durability (2 x AA)	up to 5000 measure- ments
Dimension (H x D x W)	143 × 58 × 29 mm 5.6 × 2.28 × 1.14 in
Weight (with batteries)	198 g / 6.37 oz
Temperature range: - Storage - Operation	-25 to 70 °C -13 to 158 °F -10 to 50 °C
	14 to 122 °F

* applies for 100 % target reflectivity (white painted wall), low background illumination, 25 $^{\circ}$ C

** applies for 10 to 100 % target reflectivity, high background illumination, - 10 °C to + 50 °C

*** Tolerances apply from 0.05 m to 10 m with a confidence level of 95%. The maximum tolerance may deteriorate to 0.1 mm/m between 10 m to 30 m, to 0.20 mm/m between 30 m to 100 m and to 0.30 mm/m for distances above 100 m **** applies for 100 % target reflectivity, background illumi-

nation of approximately 30'000 lux ***** after user calibration. Additional angle related deviation of $+/-0.01^\circ$ per degree up to $+/-45^\circ$ in each quadrant. Applies at room temperature. For the whole operating temperature range the maximum deviation increases by

+/-0.1°.

For accurate indirect results, the use of a tripod is recommended. For accurate tilt measurements a transverse tilt should be avoided.

Care

Safety Instructions

EN

If the message **Error** does not disappear after switching on the device repeatedly, contact the dealer.

If the message **InFo** appears with a number, press the Clear button and observe the following instructions:

No.	Cause	Correction
156	Transverse tilt greater than 10°	Hold the instrument without any transverse tilt
162	Calibration mistake	Make sure, the device is placed on a absolutely horizontal and flat surface. Repeat the calibration procedure. If the mistake still occurs, contact your dealer.
204	Calculation error	Perform measurement again.
240	Data transfer error	Repeat procedure.
252	Temperature too high	Let device cool down.
253	Temperature too low	Warm device up.
255	Received signal too weak, measuring time too long	Change target surface (e.g. white paper).
256	Received signal too high	Change target surface (e.g. white paper).
257	Too much back- ground light	Shadow target area.
258	Measurement outside of measuring range	Correct range.
260	Laser beam inter- rupted	Repeat measurement.

• Clean the device with a damp, soft cloth.

- Never immerse the device in water.
- Never use aggressive cleaning agents or solvents.

Warranty

Lifetime Manufacturer's Warranty

Warranty coverage for the entire usage time of the product according to Leica Geosystems International Limited Warranty. Free of charge repair or replacement for all products that suffer defects as a result of faults in materials or manufacturing, for the entire life of the product.

3 Years no Cost

Guaranteed service should the product become defective and require servicing under normal conditions of use, as described in the user manual, at no additional charge.

To receive the "3 years no cost" period, the product must be registered at www.leica-geosystems.com/registration within 8 weeks of the purchase date. If the product is not registered, a "2 years no cost" period applies.

The person responsible for the instrument must ensure that all users understand these directions and adhere to them.

Areas of responsibility

Responsibilities of the manufacturer of the original equipment:

Leica Geosystems AG Heinrich-Wild-Strasse CH-9435 Heerbrugg

Internet: www.disto.com

The company above is responsible for supplying the product, including the User Manual in a completely safe condition.

The company above is not responsible for third party accessories.

Responsibilities of the person in charge of the instrument:

- To understand the safety instructions on the product and the instructions in the User Manual.
- To be familiar with local safety regulations relating to accident prevention.
- Always prevent access to the product by unauthorised personnel.

Safety Instructions EN

Permitted use

- Measuring distances
- Tilt measurement
- Data transfer with Bluetooth[®]

Prohibited use

- Using the product without instruction
- · Using outside the stated limits
- · Deactivation of safety systems and removal of explanatory and hazard labels
- Opening of the equipment by using tools (screwdrivers, etc.)
- · Carrying out modification or conversion of the product
- Use of accessories from other manufacturers without express approval
- Deliberate dazzling of third parties; also in the dark
- · Inadequate safeguards at the surveying site (e.g. when measuring on roads, construction sites, etc.)
- Deliberate or irresponsible behaviour on scaffolding, when using ladders, when measuring near machines which are running or near parts of machines or installations which are unprotected
- · Aiming directly in the sun

Hazards in use

!\ WARNING

Watch out for erroneous measurements if the instrument is defective or if it has been dropped or has been misused or modified. Carry out periodic test measurements.

Particularly after the instrument has been subject to abnormal use, and before, during and after important measurements.

/!\ CAUTION

Never attempt to repair the product yourself. In case of damage, contact a local dealer.

WARNING

Changes or modifications not expressly approved could void the user's authority to operate the equipment.

Limits of use

Refer to section "Technical data".

The device is designed for use in areas permanently habitable by humans. Do not use the product in explosion hazardous areas or in aggressive environments.

Disposal

Flat batteries must not be disposed of with household waste. Care for the environment and take them to the collection points provided in accordance with national or local regulations.

The product must not be disposed with household waste.

Dispose of the product appropriately in accordance with the national regulations in force in your country.

Adhere to the national and country specific regulations.

Product specific treatment and waste management can be downloaded from our homepage.

Electromagnetic Compatibility (EMC)

!\ WARNING

The device conforms to the most stringent requirements of the relevant standards and regulations.

Yet, the possibility of causing interference in other devices cannot be totally excluded.

Leica DISTO™ E7500i 792324 28 **Safety Instructions** EN

FCC statement (applicable in **U.S.**)

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Use of the product with Bluetooth®

MARNING

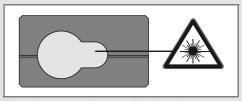

Electromagnetic radiation can cause disturbances in other equipment, in installations (e.g. medical ones such as pacemakers or hearing aids) and in aircraft. It can also affect humans and animals.

Precautions:

Athough this product conforms to the most stringent standards and regulations, the possibility of harm to people and animals cannot totally excluded.

- Do not use the product near petrol stations, chemical plants, in areas with a potentially explosive atmosphere and where blasting takes place.
- Do not use the product near medical equipment.
- Do not use the product in airplanes.
- Do not use the product near your body for extended periods.

Laser classification

The device produces visible laser beams, which are emitted from the instrument: It is a Class 2 laser product in accordance with:

• IEC60825-1: 2007 "Radiation safety of laser products"

Laser Class 2 products:

Do not stare into the laser beam or direct it. towards other people unnecessarily. Eye protection is normally afforded by aversion responses including the blink reflex.

✓!\ WARNING

Looking directly into the beam with optical aids (e.g. binoculars, telescopes) can be hazardous.

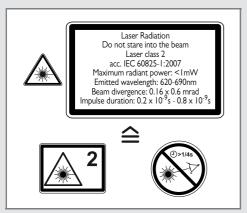

ACAUTION

Looking into the laser beam may be hazardous to the eyes.

Leica DISTO™ E7500i 792324 29 Safety Instructions EN

Labelling
